

PYTHON - DJANGO - POSTGRES

```
mkdir django-puppy-store
cd django-puppy-store
django-admin startproject puppy_store
cd puppy_store
python manage.py startapp puppies
```

To start database:

```
psql -U postgres
# CREATE DATABASE puppy_store_drf;
CREATE DATABASE
# \q
back to command prompt
```

completely optional. may
stick to default database
in settings.py

Edit files:

puppy_store/puppy_store/settings.py
django-puppy-store/puppy_store/puppies/models.py

```
python manage.py makemigrations
python manage.py migrate
```

Edit files:

django-puppy-store/puppy_store/puppies/serializers.py
django-puppy-store/puppy_store/puppies/views.py
django-puppy-store/puppy_store/puppies/urls.py
django-puppy-store/puppy_store/puppy_store/urls.py

```
python manage.py runserver
```
